8 THINGS YOU NEED TO KNOW ABOUT OPTUMA

1. Despite its enormous power and flexibility, Optuma is easy to use. Most clients are up and running within the hour. You don't need to be a programmer—everything you need is a mouse click away.
2. Optuma is not a simple web chart solution (there are plenty of those). Optuma is the most powerful and flexible Technical & Quantitative application you will ever use. You can watch hundreds of securities all with complex technical indicators while still digging in and performing your traditional analysis, even the most esoteric analysis.
3. Optuma is used by Portfolio Managers, Research Analysts, Traders, Wealth Advisors, and Private Traders around the world. You can be assured that we understand what you need and are here to help you.
4. Optuma is flexible and extensible. When you really need to research an idea, the scripting language gives you insights into what is going on. Don't know how to craft a script?—that's fine, our specialist staff, most of whom have been with Optuma for over ten years, are available to help.
5. Optuma subscriptions come with end of day data for much of the world, with new exchanges, fundamental data, and other features added all the time. It also supports real-time data feeds from a number of vendors. Ask us if your preferred source is supported.
6. Optuma makes managing lists of securities simple (from CSV, Excel, Bloomberg, or corporate databases), with automatic updates to Watchlists and RRGs(TM) when securities are added and removed. Creating reports from those securities is even easier. Just select the securities and publish them with all their notes and your favourite indicator layout.
7. Optuma keeps on getting better. No other company is as dedicated to building the ultimate technical and quantitative analysis toolbox for analysts like you. With cutting-edge additions added every quarter, and new developments waiting to be included, Optuma will give you all the traditional techniques you need plus access to new theories included.
8. Serious analysts around the world who want more than a simple web chart are shifting to Optuma. The only way you will know if Optuma is suitable for you is to download a free trial and try it for yourself. As a bonus, if you use the link below, the normal 14-day trial will be extended to 30 days.

Welcome

Welcome to the 33rd IFTA Conference!

2020 is one of the most exciting and eventful years in recent history. Volatility, Uncertainty, Complexity and Ambiguity (VUCA) became the new normal. What we had previously taken for granted became impossible and what had previously seemed impossible became self-evident. A true crisis-opportunity.

In life and markets change is constant, everything that was and is familiar to us up to now has been shaken up. This applies in particular to the way we come together. The last 32 years of IFTA conferences have always been local, in one country, hosted by one of our member societies. This year, the IFTA Conference is hosted by the Association of Technical Analysts in Germany (VTAD) - yet it does not take place in Germany. It will be worldwide, hosted in a digital virtual space.

This conference is special not only because of this reason, but also because IFTA opens its doors to likeminded professionals. Traders, investors, if you trade privately or professionally, or just want to see how to manage your assets - the 33rd IFTA Conference offers something for everyone.

Leading by example, our keynote speakers Linda Raschke, Larry Williams, John Bollinger and Dr. Van K. Tharp, are the most well-known personalities who have been dealing with one and the same topic for decades - professional trading.

Wieland Arlt, CFTe
President
Conference Director

At the same time, however, we will also let the experts from the various member societies share their voice. Experts from all parts of the world are waiting for you with their respective strategies, analysis and ideas.

We also offer a broad thematic selection. In addition to the charting technical analysis of selected assets and a critical outlook for the coming months, our experts also present numerous proven strategies and discuss the most important cross assets, notably Stocks, Commodities, Cryptos and Forex.

Another important topic featured will be Trading Psychology. As trading becomes more and more demanding this side of the equation needs to be covered as well.

...and the grand finale!

Back to digitalization again. Just as digitalization has found its way into all our lives, as this online conference demonstrates, it has already changed the world of finance. Where technical analysis used to be practiced with a ruler and pencil, artificial intelligence now takes over trading decisions.

In order to get a concrete perspective and to learn how trading has changed over the decades and will continue to do so, we will discuss with Larry Williams, Linda Raschke, Raul Glavan and Adrian Koemel in our panel discussion.

Dear visitor, I cordially invite you to participate in our conference - and also to become a part of our community in IFTA.

Sincerely,
Wieland Arlt, CFTe

MAKE YOUR CAPITAL WORK FOR YOU

www.investui.com

Investui is a modern and inexpensive way to invest. The markets display patterns called market effects or calendar effects. Many academic papers confirm the existence of market effects. Professional investors and traders make handsome profits from investments in these patterns. Investui allows retail investors to also profit from market effects. The service monitors the markets and sends e-mail alerts when a market effect occurs. One click in the e-mail converts the alert into a real position! The position is opened and closed automatically. Clients can see all positions in real-time. Sensational.

finanzen.net | ratgeber

Investui clearly stands out in a comparison with others.

24TH . 24^{EXP} . 24^{HRS}

IFTA 2020
ONLINE CONFERENCE

Wieland Arlt, CFTe • Dr. Gregor Bauer • Roman Bogomazov • John Bollinger, CFA, CMT • Daryl Guppy • Roland Jegen • Dr. Kei Nakagawa, CMTA • Koki Nozawa, MFTA • Jean-François Owczarczak • Mohamed El Saiid • Dr. Van K. Tharp • Dr. Bruce Vanstone • Larry Williams • Ron William • Dr. Hiwon Yoon • Adrian Kömel • Mathew Verdouw • Murray Gunn • Rüdiger Born • Stefano Gianti • Thierry Béchu • Tim McCullough • Yoan Zhang • Linda Raschke • Gema Goeyardi • Raul Andreas Glavan • Angelo Michel • Aria Santoso • Hendra Martono Liem • Indrawijaya Rangkuti • Linda Lee • Muhammad Alfatih • Soeratman Doerachman

Wieland Arlt

Wieland Arlt is a trader, trading coach and trainer. He is author of the bestselling books “Risk and Money Management – Simplified (German)”, “Risk and Money Management for Day and Swing Trading (English)” and “55 Reasons to become a Trader (German)” as well as of numerous articles in leading financial magazines. For years he is a sought-after speaker and expert at trader fairs.

As a trader, coach and trainer, it is important to him to convey trading approaches that are easy to understand and therefore also easy to implement.

His declared goal in trader coaching and training is to support traders in achieving their financial goals in a self-determined way and to trade successfully on the financial markets in the long term.

Wieland Arlt holds a degree in economics and is member on the board of directors of the IFTA and as well of the Vereinigung Technischer Analysten Deutschlands www.vtad.de.

Dr. Gregor Bauer

Dr. Gregor Bauer has been working intensively on the capital markets for around 20 years and works as an independent portfolio manager for private clients in Wiesbaden. He has written two books on “Technical Analysis and Trading”, regularly publishes articles in various well-known financial publications, holds seminars and workshops on “Technical Analysis” and is a frequent speaker and interview guest at investor shows and on TV. He is particularly interested in candle chart technology and behavioral finance.

Roman Bogomazov

Roman Bogomazov is a trader and educator on the Wyckoff Method of trading and investing. He is an Adjunct Professor at Golden Gate University in San Francisco, where he has taught the Wyckoff Method together with the late Dr. Henry (“Hank”) Pruden and Bruce Fraser. He is also President of Wyckoff Associates, LLC, an enterprise providing online Wyckoff Method education to traders throughout the world (www.wyckoffanalytics.com).

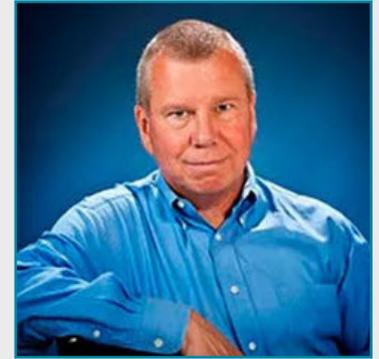

Using WyckoffAnalytics.com as a thriving trading community platform, Roman has developed a comprehensive educational curriculum covering basic to advanced Wyckoff concepts and techniques, as well as visual pattern recognition and real-time drills to enhance traders’ skills and confidence. A dedicated and passionate Wyckoffian, he has used the Wyckoff Method exclusively for his own trading for the last 20 years. Roman has also served as a Board Member of the International Federation of Technical Analysts and as past president of the Technical Securities Analysts Association of San Francisco.

John Bollinger

John Bollinger is the president and founder of Bollinger Capital Management. He personally governs all investment decisions for Bollinger Capital Management clients.

John Bollinger is a Chartered Financial Analyst (CFA) and a Chartered Market Technician (CMT). He is known to the public for his many years of market analysis and commentary on television — first on Financial News Network, where he was the Chief Market Analyst — and subsequently on CNBC.

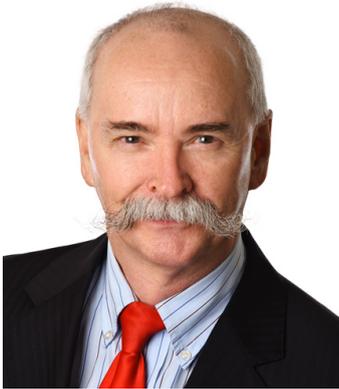

John Bollinger is also well known to professional investors. An avid researcher, he has developed a number of widely used investment tools and analytical techniques.

Daryl Guppy

Daryl Guppy has provided trading and investment analysis of financial markets for more than 25 years. His immensely popular 1996 book SHARE TRADING laid the groundwork for technical trading in Australia. He only trades his own capital. He has a well-established public record of successful trade calls for trading local and global equity, commodity and FX markets. He has unique experience in trading both Western and mainland Chinese markets. He is recognised as an international investment expert. Guppy has nine books published internationally by John Wiley. His new book is due for publication in late 2020.

He has developed several technical indicators which are included in industry standard software such as DZH International, Metastock and Omnitreader as well as many other charting programs. He developed the ANTSSYS trading indicators for commodity, index and currency markets. Globally many traders use the technical indicators developed by Guppy to trade equities and other markets. For 20 years Guppy has been a regular host anchor on CNBC Asia Squawkbox where he is known as “The Chartman”. Daryl is a regular contributor and columnist for financial magazines and media in Singapore, Malaysia, China, Australia and the US. His weekly analysis and trading newsletter has been in continuous publication for 25 years.

Roland Jegen

Roland Jegen is active in the financial markets for over 15 years. Since the beginning of 2016 he is working as a trading expert at WH SelfInvest. In addition to classical technical analysis, his favourite interests include Auction Market Theory and Volume/ Market Profile as well as automated trading systems.

Dr. Kei Nakagawa

Dr. Nakagawa is a quantitative analyst in Innovation Lab at Nomura Asset Management Co Ltd. from 2018. He engages in the R&D of cutting-edge technologies such as AI, machine learning, and FinTech and their application to the asset management business.

He received a B.A., in Economics from Kyoto University in 2012, an MBA from the University of Tsukuba in 2015, and a Ph.D. in Business Administration in 2020 from the University of Tsukuba.

From 2012, He was a risk manager and quantitative investment strategy fund manager.

He managed quantitative funds investing in Japanese Long-Short Equity, Global Equity, and REIT. He developed a lot of quantitative equity and multi-asset allocation models.

Not only does he have work experience as a quant, but he also has many academic presentations and papers on artificial intelligence, machine learning, and financial engineering including top-tier AI academic conferences.

His research interest lies in improving the method of finance by machine learning and, on the contrary, developing machine learning by the method of finance.

He teaches at Tokyo Institute of Technology, the University of Tsukuba, and Waseda University.

Koki Nozawa

Koki Nozawa, MFTA, is a fund analyst with Institute of Asset Management Research at Nikko Research Center, Inc. Nikko Research Center, Inc is a leading research firm that assists investment companies, institutional investors and securities firms in their investment product, marketing, distribution, customer retention and business development efforts.

He offers portfolio analysis, development of NBA* investment trust/stock models, research and analysis of investment trusts and hedge funds, and other tools to provide information and consulting services on asset management to a wide range of investors, including financial institutions, educational institutions and other public-interest corporations and non-listed companies. He also offers financial institutions consulting services from an Asset-Liability Management (ALM) perspective to ensure efficient investment risk management.

(*) NBA: Nikko Bond Analysis is a system offered by SMBC Nikko Securities Inc. to primarily financial institutions and other corporate investors for managing and analyzing financial products.

Jean-François Owczarczak

Jean-François Owczarczak is the CEO and Chief Investment Officer of Management Joint Trust SA, a company founded in 1969 in Geneva Switzerland, which provides institutional market advisory services based on proprietary algorithms. The methodology uses Timing oscillators, Trend analysis and Price Targets calculations to monitor risk/reward and cyclicity as well as project likely market scenarios over time frames ranging from longer term charts to intrahour. Coverage includes circa 5'000 instruments over all asset classes (stocks, indexes, ETFs, commodities, bond indexes and interest rates).

Jean-François started his career in investment banking in 1998 (Paribas, then Deutsche Bank in London), joined MJT in 2003, was awarded the International Federation of Technical Analysts' Bronwen Wood Memorial Award in 2013 (for the best CFTe certification diploma paper in the world during 2012) and also holds the FRM Financial Risk Manager certification delivered by US GARP. MJT's research products and platforms were nominated 13 times since 2015 as Finalist in various categories of "the technical analyst awards", and The Capital Observer (a joint-venture monthly cross assets research publication co-edited with a Diapason Currencies & Commodities, a London based macro research firm) won the "Best Specialist Research" category in 2018.

Mohamed El Saïd

Mohamed is currently an Executive Director and Head of the Technical Analysis department for HC Brokerage (HCB), Cairo, Egypt. He started his career working for Momentum Wavers, Ltd., a Middle East Technical Analysis firm (2001-2004). He joined HCB as an associate/lead technical analyst (2004-2006). Later he joined Unifund, a Geneva-based global private fund (2006-2007) as a Chief Technical Strategist/Co-Fund Manager to the Middle East investments.

Mohamed holds an MBA in Finance and is currently the Chairman of the Egyptian Society for Technical Analysts (ESTA), as well as an Education Sub-Committee Member in IFTA. Mohamed authored several TA-related articles and developed several indicators including the Volatility-Based Envelopes (VBE), the Implied Volatility Projection Range (IVPR) and Relative Performance Candlestick Charts (RPCC)

Dr. Van K. Tharp

Dr. Tharp offers unique learning strategies, and his techniques for producing great traders are some of the most effective in the field.

Over the years, Dr. Tharp has helped people overcome problems in areas of system development and trading psychology, and success related issues such as self-sabotage. He is the founder and president of the Van Tharp Institute, dedicated to offering high-quality educational products and services for traders and investors around the globe.

While Dr. Tharp's expertise is in the area of finance, his mission is to touch people in a way that changes them for the better. In his books, courses, and workshops, he uses the financial metaphor to do so.

Dr. Bruce Vanstone

Dr Bruce Vanstone completed his PhD at Bond University in Computational Finance in 2006. He focuses on researching and developing active investment and trading strategies, both with and without the use of Artificial Intelligence techniques. He publishes his academic work on investing and trading in Australian and International journals and conferences.

He currently lectures in Computational Finance (Algorithmic Trading and Trading Systems Design) and Big Data at Bond University, and is a consultant to a number of boutique hedge funds. He runs courses on Systems Trading (in conjunction with the ATAA) and works with private traders to enhance their performance and returns. You can read more about Bruce at <http://www.vanstonetrading.com/>

Larry Williams

Through good years and bad Larry has survived recording and teaching his market wisdom.

Larry is a best selling author featured on [Amazon](#). You can find most of the books Larry has written there.

Larry Williams has taught thousands to trade the markets, and has been the only futures trader in the world to repeatedly trade \$1 million of his own money live at seminars around the globe.

Ron William

Ron William, CMT, MSTA, is an accomplished market strategist, educator and trader, with 17-years of financial industry experience, working for leading economic research and institutional firms; producing macro research and trading strategies. He specializes in macro, semi-discretionary analysis, driven by cycles and proprietary timing models.

Ron also serves as an active trading mentor specializing in trading psychology, using the NLP model & Van Tharp Peak Performance™. Previously, Ron was a senior Tactical & Market Timing Strategist at the ECU Group, a Global Macro Investment & Advisory Firm. He was part of the Multi-Asset Research & Advisory Team, headed by Robin Griffiths, applying his signature "Roadmap" cycle model.

Ron's work, as part of his current institutional market advisory firm (RWA), acquired global industry recognition with the 2014 / 2013 Finalist Award for "Best Independent Research House for FX" and 2012 Finalist Award for "Best Technical Analyst of the year". His market insights are featured regularly across notable industry publications and financial media programs; most recently featuring [US Presidential Election Cycle analysis](#), [GBP/USD Brexit impact](#) & [EUR/USD Parity risk](#).

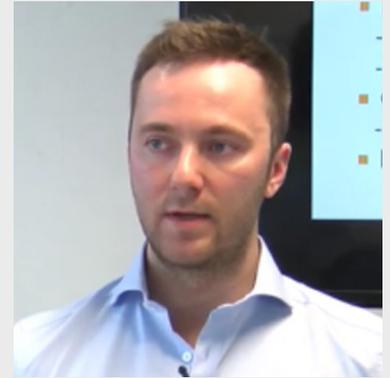

Dr. Hiwon Yoon

Mr. Yoon has a Ph.D in mechanical engineering from Keio University in Japan. In 1989, he received his M.S. in hydro-dynamics from Keio University in Japan. Since 2007, he has been president of CMD Laboratory Inc. He manages the firm and creates models for financial markets. From 2000 to 2007, he was a director of CMD Research Ltd., where he managed the firm and analyzed financial markets. From 1996 to 1998, he was a trader of Japanese stock for Salomon Smith Barney (Japan), where he traded a portfolio of Japanese stock and derivatives. From 1993 to 1996, he worked in sales of Asian stocks for Salomon Brothers Asia Ltd (Japan), marketing Asian products, such as stocks and derivatives. From 1992 to 1993, Mr. Yoon was a trader of Asian stocks for Salomon Brothers Hong Kong Ltd (Hong Kong). In this position, he managed arbitrage positions for Asian stocks and derivatives. From 1989 to 1991, he was a trader of Japanese stock for Salomon Brothers Asia Ltd (Japan), where he traded Japanese stock and derivatives. His subject area are Technical analysis of the Bitcoin, AI and FinTech and Algorithmic trading.

Adrian Kömel

Adrian Kömel studied business mathematics and successfully completed it as one of the top students. He got into trading through an internship and got to know his trading partner Tobias Bärlin with whom he has been working and trading since then and built the website www.suricate-trading.de. Tobias has been trading for around 15 years now, Adrian has been trading full-time for around 7 years. First they dealt with statistical approaches and evaluated the markets using simulation programs and looked at what works and what doesn't. Through the World Trading Championship you have become aware of other approaches and have analyzed what the best in the world trade and how they do it. So they got to know the CoT data and developed their own trading system which combines different approaches. This system combines CoT data, timing instruments, volume profiles and the footprint chart.

They have been participating in the Trading World Championship for 3 years now and have been among the 5 best traders in the world every year.

Mathew Verdouw

Mathew Verdouw, is the CEO and Founder of Optuma, and has been living and breathing Technical Analysis for over 24 years. As a Computer Systems Engineer, he wrote his own TA platform, which has been used all over the world from private traders to major firms. More recently, Mathew has become the only person in the world to teach the latest curriculum of all three levels of the CMT program. His broad exposure to Technical Analysis and his engineering background has led to many new insights and brand new ways to model analysis. Mathew is a staunch believer that there are still many new discoveries to be made in the area of Technical Analysis and that Technicians should be at the forefront of all quantitative development.

Murray Gunn

Murray Gunn is Head of Global Research at Elliott Wave International. He worked as a fund manager in global bonds, currencies and stocks, including long posts at Standard Life Investments and the Abu Dhabi Investment Authority. He then joined HSBC Bank as Head of Technical Analysis. Murray is the author of *Trading Regime Analysis* (Wiley, 2009) and a contributor to *Sociconomic Studies of Society and Culture* (Sociconomics Institute Press, 2017). In April 2018, Murray took over the helm of *The European Short Term Update*. You can also read his commentary in *Global Market Perspective*, *Interest Rates Pro Services* and *Currency Pro Services*, and on deflation.com.

Rüdiger Born

Rüdiger Born is managing director of BORN Traders and also founder and head of trading of BORN STAHLBERG & PARTNER, his asset managing enterprise in Switzerland. Since early in the 90s he is an active trader at the international financial markets. Stock trading is part of his daily trading business in the same way as trading currencies, futures and options. Additionally to the classical trading instruments in the meantime CFDs are also in his daily focus.

Beside the trading Rüdiger Born is an advisor for a significant number of exchanges, banks, brokers, fund managers and financial service companies domestic and abroad. Furthermore he is internationally engaged in seminars, webinars and personal trainings for institutional and private traders. Continuously Rüdiger Born is seen in television and internet as a trading and market expert. Countless publications in the financial press fulfil the picture of his considerable activities.

Stefano Gianti

Stefano Gianti is Education Manager for Swissquote Bank, a world leader in online trading.

His training sessions focus on the correct management of portfolio risks and maximizing profits through the use of CFDs on equity indices, commodities and currencies.

His analysis also focuses on the Macroeconomic situation of the markets and related events that could influence them.

He is member of SIAT (Italian Society of Technical Analysis). He is hosted on weekly basis by CNBC, SKY and RAI television and other networks on the expectations and trends of the financial markets.

email: stefano.gianti@swissquote.com

Thierry Béchu

Bachelor's degree in Economics and Master's degree in Finance - Orléans University.

Started as Financial Analyst in a stock brokerage company where he discovered the TA world and moved to this space as Technical Analyst

He co-wrote a french book on TA, almost the first one on this topic. It had a lot of success (more than 30k books sold), a best-seller for the editor Economica.

He also participated to the creation of AFATE, french association for TA

Then He moved to the trading space with various positions at Dresdner Bank, Commerzbank in Frankfurt, and Société Générale in Paris and Lombard Odier in Geneva

In the meantime, he moved from the PT side to the HF industry facing clients and investments constraints.

Thierry also teaches TA and Risk Factors at Paris-Dauphine University.

Tim McCullough

Tim is the application specialist in Technical Analysis at Bloomberg LP in London, where he manages the rapidly increasing demand for charting and data visualization tools in EMEA.

He has over 30 years' experience in financial markets, in trading, sales and research at major international banks, including State Street, UBS, BNP Paribas and Lloyds. He uses diverse but complementary technical methodologies, based on behavioural finance, to help Bloomberg clients to analyse sentiment in all asset classes and all conditions of volatility and liquidity.

In 2018 he additionally took an MSc in Financial Investigation, including a dissertation examining the dependency of financial markets on illicit flows from money laundering. He previously took a BA in Classics and is a full member of the Society of Technical Analysts in London and of IFTA.

Yoan ZHANG

Yoan owned master degree of Finance in HEC Paris, he started his career as equity trader in Chicago. In 2011, He obtained CFTe and worked as analyst in top European institutions. After turning back to China, Yoan has worked in strategy development and served on leading private equities and hedge funds in Shanghai since 2016. His research is focused on behavior finance and published on mainstream media. As a board member of FTAA, Yoan is one of the main instructor in Technical Analysis courses in China Mainland organized by FTAA for the IFTA Certification. He is also one of the most appreciated financial trainer in China, he has taught in a few hundred seminars to both retails and professionals in the past 4 years.

Linda Raschke

Linda began her professional trading career in 1981 making markets in options as a member of two exchanges. She has been a CTA, principle trader for several hedge funds, and a CPO (commodity pool operator). Her own hedge fund was ranked 17th out of 4500 for best 5 year performance by BarclaysHedge. Her early successes were recognized by Jack Schwager in his renowned Market Wizards series.

She cowrote the wildly popular "Street Smarts" book in the mid '90s. And in 2019, she released the widely acclaimed "Trading Sardines: Lessons in the Markets by a Lifelong Trader" in 2019, available only at LindaRaschke.net. She remains a professional trader and an eternal student of the markets.

HC Brokerage

Ever since our doors opened in 1996, we have maintained our position as an active regional player in the Arab World. As an organization, our goal is to help partners, clients, and staff reach their goals by providing leading financial services in multiple markets across the region.

By hedging our bets in both emerging and frontier markets, we have developed the contacts and relationships to help clients succeed with a variety of objectives.

At Wyckoff Analytics, we teach you to trade in step with the institutions that dominate the markets. Our overarching goal: to help you become consistently profitable through a series of interactive online classes based on the pioneering market insights of legendary trader and educator, Richard Wyckoff. Many successful professional traders rely on the Wyckoff Method to “read the market,” allowing them to discern the intentions of “the smart money,” and thus to anticipate (and profit from) future price movement.
