President's Report to Colleagues

The older we get, the faster it seems that time passes by. I am still thinking of the last IFTA Conference in Melbourne while the organization committee of the Asosiasi Analis Teknikal Indonesia (AATI) is already working on the next one happening in Jakarta.

But, of course, that's not the only indicator of how fast time flies. While we as technical analysts are practicing an art and profession which reaches back to the 16th century—and still are using these ancient techniques as well as newer approaches, most of the tools we are using were developed decades, if not centuries, ago.

But time changes here as well. Progress—or shall I say disruption—comes into technical analysis with a deep impact. Artificial intelligence and quantitative analysis are have been used for some time now, and algorithms have taken over quite a reasonable part in trading, too.

So, what does this mean for us as IFTA and for you as members and member societies? Of course, we will face these changes as we have

already embraced digitalization with online conferences, workshops, and webinars.

Times are changing and so do we. As time passes by quickly, we adapt on these changes. I am more than happy to announce that the education committee is about to implement a Quantitative Analysis syllabus for our certification programs.

With this, we are making sure that we still can say that IFTA is the place “where market technicians from around the world speak the same language.”

Yours,

Wieland Artl
IFTA President 🇩🇪

Announcing IFTA's First International Goodwill Ambassador

In late January, it was my distinct pleasure as a director of IFTA to appoint the first of—hopefully many—International Goodwill Ambassadors for IFTA.

The first is a well-known technical analysis figure and veteran who has practised and selflessly promoted technical analysis all around the world for five decades. It is in recognition of this past service, and yet many more years of devotion and service that he will now provide to IFTA, that I have the pleasure in confirming the credentials and introduction of His Excellency Mr. Trevor Neil FSTA, MCSI & ACI-UK as IFTA's first International Goodwill Ambassador.

He has already visited several countries in his role promoting both IFTA and technical analysis. If you see or meet him on his travels, please give him a warm welcome.

Eddie Tofpik, MSTA
IFTA Director

IFTA Technical Analysis for Institutional Investors CALL FOR PAPERS

Technical Analysis for Institutional Investors is a publication established by the International Federation of Technical Analysts (IFTA). It is compiled by a committee of IFTA colleagues. Technical Analysis for Institutional Investors is an essential reading for academics, students, and practitioners of technical analysis in institutional portfolio management and trading. It contains a wealth of resource material and is an excellent reference for anyone interested in technical analysis.

Technical Analysis for Institutional Investors is the only international publication with original contributions from all continents covering developments in technical analysis in global markets. The publication reaches leading practitioners and students of technical analysis throughout the world.

Technical Analysis for Institutional Investors is a major professional resource. Its archival online publication on the IFTA website will make your original work available as a future resource to the worldwide community of technical analysts.

IFTA is seeking papers that cover developments impacting, either directly or indirectly, the field of technical analysis focusing on institutional portfolio management and trading; they may be drawn from such areas as:

- Market analysis techniques
- Global and intraglobal technical analysis
- Styles of technical analysis
- Commodities and energy trading
- Intermarket analysis
- Stocks/bond screening
- Dynamic Asset allocation
- Strategies (i.e., sector rotations...)

We would especially like to see contributions that draw from areas not previously examined and/or topics tangential to technical analysis.

The above list is just a guide and should in no way be considered restrictive. We wish to make the publication open to new and innovative ideas from all areas of technical analysis and those that connect with it.

Submitting Contributions

Registration and submission of contributions is online via www.ifta.org or by email to the editor at institutionals@ifta.org.

Language

Contributions must be submitted in English, with British grammar required.

Writing Style

Papers should be written in a thesis style. Guidance can be found at the following link:

http://www.ifta.org/public/files/publication-downloads/MFTA_Thesis_IFTA%20Journal_Guide.pdf

Referencing

All texts referred to in the paper must be appropriately referenced in a list of "References" at the end of the text. Further, all notes are to be included as endnotes ("Notes"). A bibliography is not to be included.

The author is responsible for the accuracy of references and quotations. We expect the author to check them thoroughly before submission.

Figures, Charts, and Tables

Illustrations and charts must be referred to by figure number and source. Tables must be referred to by table number and source.

Length of Contribution

Papers should be approximately 1,200 to 3,000 words, with supporting graphs and charts.

Format

We ask for submissions in MS Word or other text format, as well as a PDF. Charts and graphs may be in .GIF or .JPG, but we ask that authors also keep a .TIF format in case it is required for printing purposes. An Excel spreadsheet supporting your submission may also be included.

Licenses and Copyright

We require all submissions to include the author's signature on the Publication Agreement at the end of this document.

We may publish online. We require that you place your submission under the Creative Commons AttributionNonCommercial 3.0.

Unless another license is noted, we will assume that your contribution is under this license.

IFTA Journal CALL FOR SUBMISSIONS

The *IFTA Journal* is an annual publication established by the International Federation of Technical Analysts. It is collated by a committee of IFTA colleagues. The *IFTA Journal* is essential reading for academics, students, and practitioners of technical analysis in all arenas. It contains a wealth of resource material and is an excellent reference for anyone interested in technical analysis.

Credibility and Recognition

The *IFTA Journal* is the only international journal with original contributions from all continents covering developments in technical analysis in global markets. The *Journal* reaches leading practitioners and students of technical analysis throughout the world.

The *IFTA Journal* is a major professional resource. Its archival online publication on the IFTA website will make your original work available as a future resource to the worldwide community of technical analysts.

Topics

IFTA is seeking papers that cover developments impacting, either directly or indirectly, the field of technical analysis; they may be drawn from such areas as:

- Basic market analysis techniques
- Indicators—sentiment, volume analysis, momentum, etc.
- Global and intraglobal technical analysis
- Styles of technical analysis
- Data
- The changing role of technical analysis in the investment community

We would especially like to see contributions that draw from areas not previously examined and/or topics tangential to technical analysis.

The above list is just a guide and should in no way be considered restrictive. We wish to make the *Journal* open to new and innovative ideas from all areas of technical analysis and those that connect with it.

Submitting Contributions

Registration and submission of contributions is online via <http://www.ifta.org>, or by email to the editor at jour-nal@ifta.org.

Language

Contributions must be submitted in English, with British grammar required.

Writing Style

Papers should be written in a thesis style. A guidance can be found at the following link:

http://www.ifta.org/public/files/publication-downloads/MFTA_Thesis_IFTA%20Journal_Guide.pdf

Referencing

All texts referred to in the paper must be appropriately referenced in a list of "References" at the end of the text. Further all notes are to be included as endnotes ("Notes"). A Bibliography is not to be included.

The author is responsible for the accuracy of references and quotations. We expect the author to check them thoroughly before submission.

Figures, Charts, and Tables

Illustrations and charts must be referred to by figure number and source. Tables must be referred to by table number and source.

Length of Contribution

Papers should be approximately 1,200 to 3,000 words, with supporting graphs and charts.

Format

We ask for submissions in MS Word or other text format, as well as a PDF. Charts and graphs may be in .GIF or .JPG, but we ask that authors also keep a .TIF format in case it is required for printing purposes. An Excel spreadsheet supporting your submission may also be included.

Licenses and Copyright

Society of Technical Analysts
A Professional Network For Technical Analysts

Balance professional development and your personal life with the STA Home Study Course[©]

WHY PURCHASE THE HOME STUDY COURSE?

The world-class e-learning Home Study Course (HSC)[©] is written by leading industry practitioners, making it one of the best online products available on the technical analysis market. Whether this is your first introduction to technical analysis, you want to refresh your existing knowledge, or you wish to become a **qualified technical analyst**, the STA offers a tailored Home Study Course as part of our portfolio of world respected courses preparing students for our **internationally accredited STA Diploma qualification**.

You can learn from the comfort of your home at times that best suit you. Although website based, it is fully downloadable and may be used online or offline via PC, Mac, iPad or Android machines.

WHAT WILL IT COVER?

- The syllabi for both STA Diploma Part 1 & Part 2 examinations
- 15 in-depth subject teaching units
- Exercises to self-test progress
- Exam preparation module & video
- Advice on report writing. ...find out more [here](#)

Since the HSC is International Federation of Technical Analysts (IFTA) syllabus compliant it can also be used to prepare candidates for both the IFTA CFTe I and II examinations.

WHO IS THE COURSE FOR?

The course is intended for individuals who want to use technical analysis in a professional manner or who want to become a qualified technical analyst and advance their career. [Enroll and start studying now!](#)

For more details click [here](#) or contact the STA office on +44 (0) 207 125 0038 or info@technicalanalysts.com

WHEN WOULD YOU LIKE TO START?

Learn at your own pace rather than in a classroom - the HSC course is designed for those who need a truly part-time study option with maximum flexibility!

[Buy now:](#) £1,195.00

Don't Get Caught Inside When You Can Be Hanging Five

OK, so truth be told, we had a fairly heated discussion at Elliott Wave International over the direction of this ad. Do we go straight serious, like just about every other ad? Or do we show our playful side, in the hope that you won't just skip past it like all those other ads?

Because on the one hand, the Certified Elliott Wave Analyst (CEWA) designation is dead serious. The CEWA program is *the* standard for Elliott wave analysts. But at the same time, the Wave Principle is gnarly, dude – why surf the chop with the kooks when you could be rippin' the best waves with the locals.

And so, in an exclusive arrangement with our buds at IFTA, EWI now offers the Certified Elliott Wave Analyst (CEWA) designation for the coolest dudes: Elliott wave pros, analysts and traders.

Your CEWA designation lets everyone know that you're a legend in the practical application of the Elliott Wave Principle, one of the most recognized forms of technical analysis. With CEWA you can finally paddle out away from the crowds and find some open water where you can shoot the curl.

Show your CEWA designation to potential employers and prospective clients, so they know YOU know where the bombs -- and the grey fins -- lurk.

Get Started. Visit www.elliottwave.com/wave/GetCertified

“Is it just me, or has Wilson gained some confidence since he became a CEWA?”

Member News

Canadian Association for Technical Analysis (CATA)

I reported to IFTA readers one year ago that “there is a new kid on the block.”

The Canadian Association for Technical Analysis—CATA—was formed one-and-a-half years ago. This is a result of former IFTA member Canadian Society of Technical Analysts (CSTA) spinning off the non-professional members.

At year end in 2022, the “new kid” had 60 paid and five honorary members. CATA holds two monthly meetings via Zoom and held an in-person national conference 15 October 2022 in Calgary. Members were represented at the conference from across six different Canadian time zones.

Our twice-monthly meetings start at 8:00 PM ET, with the structure of a presentation by a speaker that leads to Q&A. The speaker and Q&A generally take two-thirds of the two-hour meeting. The president presents a few minutes of greetings and administration at that rough mid-point. That last half of the meeting is available for the attending members to open their mic and enter into a live Q&A conversation with our renowned speakers. In many meetings, the guest speakers continue with chart questions/comments posed by the individual members. In this second half of the meeting, two of our directors call up the charts, mark the charts, and host the discussion on what is happening. The meeting will wrap up at the two-hour mark. By then, it’s pretty late throughout the country.

To repeat what I said before and to add, I am so pleased that a group of us were able to enact a plan for the non-professional chartists in Canada, and that we have a viable structure going forward. In 20 months of hard work, we have a name, a logo, a website, a membership base, renewing members, positive finances and 17 months of two meetings per month. We have had wonderful support from professionals who have been called to support us. We look forward to the positive relationship with IFTA and individual IFTA members.

I want to recognize the following speakers who have helped us to date. Thank you to: Keith Richards, Ron Meisels, Greg Schnell, David Cox, Don Vialoux, Dwight Galusha, Jake Wujastyk, Matt Caruso, Tom Bowley, Patrick Ceresna, Larry Williams, Connie Brown, Mark Kelly, Hap Sneddon, Rick Bensignor, Cory Mitchell, Jermaine McGruder, Brian Shannon, Jake Bernstein, Robert Lamy, Jeff Parent, Agnieszka Wood, Brooke Thackery, and Jan Vialoux. I know that coming up will be Scott Bennett, Joe Rabil, Jordan Youl, Scott McGregor, and Matt Petrallia.

Thank you again to past speakers & members of the IFTA community, CATA members, and our board of directors.

Mark Soehner, MBA
President, CATA
Mark.Soehner@Canadianata.org

Member News continued

The Society of Technical Analysts (STA)

Our main news is that on 18 April 2023 the STA will be hosting its inaugural **Technicals to Trading Systems** hybrid conference, taking place in the city of London and online on 18 April 2023, 9:00 am–5:30 pm BST.

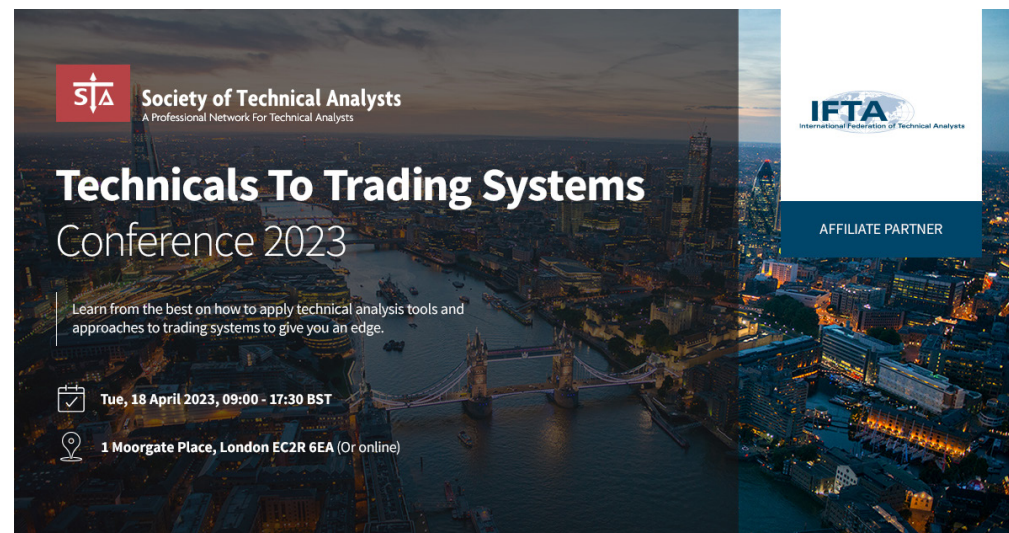

We are delighted that IFTA members are able to attend this event at the **discounted member rate**.

Technical analysis professionals apply a wide range of techniques to assess markets, including the study of repetitive patterns on charts, mathematical calculations to determine the speed and momentum of a move, and statistical tools to identify extreme conditions. A natural progression is to extend these ideas into full trading systems that can be tested and implemented. Delegates will have the unique opportunity to learn and engage with industry leaders about the extension of technical analysis into trading systems.

During the course of the day:

- Hear and take part in presentations and a panel debate that will inform the progression of the profession.
- Take this unique opportunity to see and hear specialists who have been known to innovate and challenge the profession, and quantitative specialists who can provide a systems/structure to enhance the technical analysis discipline.
- Learn more about applying technical analysis tools to an automated trading system approach.
- Discover if a trading system approach can help you to quantify your technical trading and risk management tools.

Speakers include **Perry Kaufman**, KaufmanSignals.com; **Robert Carver**, author and lecturer at Queen Mary University, London; and **Professor Jessica James**, Senior Quantitative Researcher at Commerzbank AG.

Find out more [here](#).
